

Climate Change in 2010: Global Changes . . . Local Impacts

A series of informative talks presented by

The Asheville Chapter of the American Meteorological Society and the Colburn Earth Science Museum

**TUESDAY
FEB 16, 2010
7:00 PM**

Climate Change and Local Food and Agriculture

How might a changing climate affect the way we grow and consume food in Western North Carolina? Our panelists will lead a community discussion to investigate expected impacts as well as potential solutions to developing secure and sustainable food and farming in WNC.

**TUESDAY
MARCH 16, 2010
7:00 PM**

Climate Change and Local Health

Human health is influenced by a complexity of factors, many of which are attributed to our local environment. Our panelists will lead a community discussion to investigate the potential impacts from the viewpoint of traditional and complimentary health professionals.

**TUESDAY
APRIL 13, 2010
7:00 PM**

Climate Change and Local Wildlife and Plants

Situated in the oldest mountains on Earth, Western North Carolina is known for its amazing biodiversity. Our panelists will lead a community discussion about how a changing climate might impact the area's delicate natural balance, its wildlife, and its blossoming natural products industry.

Diana Wortham Theatre at Pack Place
Asheville, North Carolina

All presentations are FREE and open to the public.

Each presentation is followed by a "Meet the Presenters" reception at the Colburn Earth Science Museum.
